

Frenemy Interactions

On Zoom. May 27th.

Peer Developer Feedback Session

Team 2 Member: Motoki Shintani

Bugs found:

- Variable size for custom recipes displayed as undefined.
- Suggestions within the search page do not conform to the user's filters.
- Pressing enter causes no search.

Suggestions:

- Validate user inputs.
- Validate images being uploaded to their recipe.
- Linting for HTML & CSS.
- Allow for free movement between backend and frontend team.

Suggestions undertaken:

- Validate user inputs: Checks being made for recipe inputs
- Validate images: Force images to be stored locally. No uploading to the database.

All bugs fixed.

End User Feedback Session

Team 2 Member: George Gavrilov

Notes:

- The desktop layout is heavily skewed towards mobile, dashboard seems empty.
- Not super intuitive how to use the application.
- The navigation bar is at the bottom, an uncommon form to have the Ui be displayed.
- Settings is a bit confusing: Preferences and Versions could have a top down rather than a single page for it.
- The recipe difficulty is unintuitive.

Suggestions undertaken:

- Not super intuitive how to use the application: Added an onboarding tool to better demonstrate the user.
